THIS IS UNEVALUATED INFORMATION

2. The school consisted of a number of buildings which were the command head quarters office, individual study halls, sleeping quarters of the various companies, intelligence office, and the classrooms of the school.

1. A four story, flat roofed, yellow brick constructed modern building. The name of the school was on the front of the building.
2. An educational (cultural) building and gymnasium. One half of the building was occupied by the gymnasium and the other half, which was three stories high, was occupied by the library reading room and theater. This was a modern brick building.
3. A three story modern flat roofed yellow brick building. This contained the department of soldiering (infantry). It consisted of classroom in which were taught tactics (tactican) and terrain study, radio and telegraphic transmission, methods, atomic defense, defense against chemical artillery weapons, service and techniques of artillery weapons.
4. An old two story brick building which was painted yellow. "A" was the guards' room. This was where the guards rested. The commander of the guards was in touch by telephone with the officer on duty at the school and with guard post "B". There was a formal change of guards every two hours. During the night the guards were checked but at no given time or interval by the regimental officer on duty. The clothes and food storage room occupied the rest of the building.
5. A three story brick building. It housed the cadets' mess hall as well as departments of artillery materials (shells), chemistry of explosive materials, radar functions, methods & improving explosives.

6. Various subjects taught here, such as investigation of materials, metallography, technical drawing, and fuels for motor vehicles. It also housed the Department of Mechanics. The officers' kitchen and infirmary were in back of the building.
7. An old two story brick building which contained from three to five rooms. Artillery materials and fuels of motor vehicles were taught in this building.
8. A two story modern building with flat roof and was open in front. This was a garage for motor vehicles. The repair shop was located next to it.
9. A two story modern gray brick building. This was the storage for the weapons for the infantry and instruments and materials necessary for artillery marksmanship were stored here.
10. A two story flat roof gray brick building. This was the repair shop for the weapons for the infantry.
11. A two story stone building. It did not have a flat roof and was surrounded by ramparts of earth on which a guard moved constantly. This was a storage building for infantry weapons for shells and hand grenades. Guard post "G" kept in verbal touch with guard "B" and with signals with the guard room (building 4).
12. A two story modern gray building. It contained a small rifle and pistol range.
13. A two story building with a flat roof. This was the officers' quarters.
14. An old two story building which was the officers' quarters.
15. An old two story building which was also the officers' quarters.
16. An old two story stone building. The officer in charge of vehicles and maintenance was located in front of this building. The remaining part of the building was used as coal storage.
17. A two story small building with a flat roof. It was used for gas storage.
18. An old dilapidated two story building which was used as storage rooms.
19. An old two story stone building which was a dressing room for athletes and also housed the caretaker for the athletic field.
20. Concrete garbage container.
